

**Job Title: Technical Manager**  
**Based at: Haverfordwest Creamery**

Does being part of a dynamic team in a fast-paced manufacturing environment excite and enthuse you? First Milk has the answer.

We have a fantastic opportunity for the right person to join our Haverfordwest Creamery team as a Technical Manager where you can play your part in creating a sustainable dairy industry for the future.

To be successful in this role you will be energised and excited by the opportunity to transform the full end to end site operations by leading a small team of technical specialists and will be just as comfortable on the factory floor as you are contributing to the overall leadership of the site.

The ability to build a 'one team' ethos, set high standards and deliver excellence every time is a pre requisite for this role. Candidates will need to have held previous senior site technical leadership roles ideally within the dairy industry but certainly within a food manufacturing / processing environment and can clearly demonstrate their success.

The company is committed to a continuous improvement programme underpinned with a long term capital investment plan.

This role requires a 'hands on' leader who knows how to get results; improvements to production whilst driving quality, maintaining food safety, performance and health and safety will be second nature!

If you are someone who relishes a challenge we would love to hear from you.

Interested? Please email your up to date CV along with a cover letter detailing why you have applied for the role and what differentiates you from other candidates.

If you want to join our great team, please submit your CV to [recruitment@firstmilk.co.uk](mailto:recruitment@firstmilk.co.uk)

**The closing date for applications is 10<sup>th</sup> August 2019**
