

## **Process Technician Based at The Lake District Creamery**

We are now seeking to appoint a Process Technician based at our Lake District Creamery site.

As the Process Technician you will be responsible for 'deep diving' into the processes of the LDC creamery to investigate CIP efficiency, product losses, energy use and process issues. Working closely with Engineering, SHE and Technical departments.

### **Principle accountabilities:**

- Checking and 'tuning' of CIP's to ensure that cleaning is carried out effectively and efficiently using minimal amounts of water and chemicals.
- Conducting investigations into the process to ascertain areas of fat loss and mass balance of product components.
- Carrying out product loss investigations measuring and testing loss in areas of the factory.
- Carrying out energy investigations such as steam, electricity, chilled water and compressed air. Using the carbon desktop system to diagnose trends and create investigations and theories and actions to reduce energy use.

### **Key knowledge, skills and expertise:**

- IOSH Managing Safely.
- Process knowledge (cheese, whey, milk, CIP's etc).
- Analytical mind, able to interrogate relevant data.
- Good numerical and computer literacy skills.
- Ability to apply fault finding techniques to find root cause of issues.
- Experience of working with multi-functional teams to work within disciplined processes and timeframes.
- Have the ability to communicate and report and devise solutions in collaboration with others.

If you believe you have what it takes to make a significant contribution to the on-going and future success of the company, please send us your CV via email to:
